The outstanding new 45 from Prout.

The culmination of a cruising catamaran success story spanning more than forty years. The Prout pedigree is unique. The new Prout 45 will become the standard by which all other aspirants to the title of "the definitive world cruiser" are judged. She achieves the perfect balance of luxurious space and long term "livability" within a performance envelope optimised for short-handed cruising. Developed from the successful Prout 39, the new boat has further extended the concept of space, style and performance. She is as ready to roam the World's ocean highways as she is capable of slipping into the

shallowest lagoon and settling on a deserted beach. Nothing comes close - except another Prout.

## y o u r l i f e i n o u r h a n d s

4500 Prout catamarans, sailing millions of ocean miles, have never recorded a hull failure. A remarkable testimony to Prout's designers and engineers - and to the integrity of the structure, a structure which has earned Prout many awards over the years. This means however tough the going becomes, your boat will not be found wanting. The new 45 incorporates many unique features to further enhance her seakeeping qualities. Hydrodynamic "winglets" on the low aspect ratio keels reduce pitching and improve windward performance. Newly designed skeg mounted rudders have been carefully balanced to lighten helm loads, increase responsiveness and enhance the speed through the tack. Diagonal torsion control

bulkheads virtually eliminate twist between the hulls when plugging into short steep waves. Like all the best engineering, these new developments are unseen to those fortunate enough to enjoy life aboard a Prout cruising catamaran. A life with total peace of mind in the knowledge that Prout's beauty is not merely skin deep.
